## Overview

---

Where is the Netherlands' largest battery energy storage system located?

Dispatch, a leading Dutch battery developer, is going to construct the Netherlands' largest stand-alone Battery Energy Storage System (BESS). This groundbreaking 45MW/ 90Mh utility-scale BESS will be located in the port area of Dordrecht, on a 6000m<sup>2</sup> site and will be used for grid stabilization by storing excess energy from renewable sources.

What is Bess in the Netherlands?

BESS in the Netherlands is a new and small but increasingly necessary industry. A striking growth in battery capacity began in 2021 when the total installed capacity rose by 65% compared to the previous year. This number doubled in 2022 and then tripled in 2023, reaching 621 MWh.

Who makes the Bess battery?

Conducting the engineering and construction of the BESS is the multinational company, Equans Netherlands. Dutch energy player, Eneco, is tasked with tweaking the battery for optimal performance, enabling it to maintain the grid's balance without escalating local congestion.

What are the economic opportunities for Bess assets within a Dutch electricity market?

We highlight the economic opportunities for BESS assets within one of the Dutch electricity markets in this article. The Dutch electricity market is undergoing a significant shift towards renewable energy, primarily solar, wind, and other sustainable sources.

What is a battery energy storage system (BESS)?

The Dutch electricity market is transforming with increased solar, wind and other renewable power, creating opportunities and challenges. Battery energy storage systems (BESS) are vital for managing market volatility and

capitalizing on price fluctuations.

How many MWh can a Bess battery store?

The sophisticated BESS consists of 144 cutting-edge lithium-ion sealed cells -known as Fluence cubes - boasting a formidable capacity of 90MWh. In relative terms, this battery can store power sufficient to fulfill the energy demand of approximately 21,500 homes each day.
