Are all the base stations on the roofs of China Communications Buildings 5G

Overview

How many 5G base stations will China have by 2025?

China's Ministry of Industry and Information Technology (MIIT) plans to more than triple the number of 5G base stations over the next four years, targeting a total of 3.64 million by end-2025, local newspaper China Daily reported. China aims to have about 3.64 million 5G base stations by the end of 2025.

How has China Tower changed since 5G issuance?

The relatively young Chinese tower industry had been remarkable for the pace and volume of new site build: over 570,000 sites were built in China Tower's first five years to July 2019. But since the issuance of 5G licenses, new build volumes have reduced by two thirds. The focus has shifted to enabling the industrial applications of 5G.

How many 5G towers has China built in a year?

China Tower Corporation (CTC) deployed RMB 2bn (US\$285mn) to build a staggering 570,000 towers in its first five years to July this year. Since China's 5G licenses were issued in that same month, July 2019, CTC have built just 20,000 new towers – their new build rate has dropped by almost two thirds.

How many 5G base stations does CTC have?

CTC's tenants have already deployed 100,000 5G base stations (roughly 5% of their total tower stock), rising to 150,000 by 2019 year end.

How many 5G subscribers does China Mobile have?

China Mobile has added a total of 166.22 million subscribers in the 5G segment since the beginning of the year. Rival operator China Unicom said it added a total of 7.88 million 5G subscribers during last month. During the first nine months of the year, the carrier added a total of 66.11 million 5G subscribers.

How many 5G antennas will CTC have in 2020?

There could be close to a million 5G antenna arrays on China's towers by the end of 2020, all contributing to CTC's impressive tenancy growth: CTC has doubled the number of tenants on China's towers since absorbing 1.4mn towers with 1.5mn tenants in 2015.
