Battery Cabinet A23

Overview

What is A23 battery?

The A23 battery is a 12-volt alkaline battery with 8 LR932 button cells configured in a series combination. The structure of the cell is enclosed in a wrapper. It is used to power devices like Bluetooth game controllers and other remote control devices. In this post we will cover its features, types, and other factors.

What type of holder is suitable for a 23A (A23) battery?

Security sensors, or doorbells. What type of holder is suitable: Look for holders specifically made for 23A (A23) batteries, ensuring correct size, reliable contacts, and the desired mounting method. Recommended product: The Memory Protection Devices BH23APC is a dependable choice for a compact, secure, and easy.

What is the difference between A23 and N Batteries?

The A23 battery is often compared to other small batteries like the A27 and N batteries. While both have similar applications, they differ in size and voltage: A27 Battery: Similar voltage (12V) but smaller in diameter. N Battery: Lower voltage (1.5V) and typically used in different applications.

What is the difference between A27 and A23 battery?

It is similar in size to the A27 battery but offers a higher voltage output. The A23 is often used in devices like remote controls, keyless entry systems, and wireless doorbells, where compact size and reliable power are essential. The A23 battery is often compared to other small batteries like the A27 and N batteries.

What is A23 12V battery used for?

The A23 12V battery is commonly used in various devices, including remote controls for garage doors, car alarms, keyless entry systems, wireless

doorbells, small medical devices like glucose meters, personal alarms, and certain electronic toys. Its compact size and high voltage make it ideal for these applications.

What is a 23 battery used for?

The A23 battery is compatible with different devices and is the best power source for different devices. It can easily be used in remote control and keyless energy systems, medical devices, and small security sensors.
