Belgian grid energy storage

Overview

Belgium is one of the most active and mature grid-scale energy storage markets in Europe, with diversified opportunities for monetising battery storage via flexibility markets and a supportive regulatory regime. How much battery storage does Belgium have?

Belgium's battery storage buildout remains modest relative to peer nations. As of 2023, the country had under 200 MWh of operational large-scale battery capacity, compared to over 2 GWh in the UK and more than 1 GWh in Germany.

Is Belgium a good place to invest in battery storage?

Belgium is one of the most active and mature grid-scale energy storage markets in Europe, with diversified opportunities for monetising battery storage via flexibility markets and a supportive regulatory regime.

Is grid reliability a key challenge for Belgium?

As Belgium prepares for the 2025 nuclear phase-out, grid reliability is emerging as a central challenge.

Who is delivering a battery energy storage system?

It will be delivered by Italian developer NHOA Energy. French state-backed utility Engie has broken ground on the second of the battery energy storage systems (BESS) awarded it by Belgian grid operator Elia under a national plan to procure more grid electricity.

What is the largest battery energy storage system in the world?

It is the site of the largest permitted battery energy storage system (BESS) on the continent at 2.8GWh, one of the largest under construction at 800MWh, and two under-construction projects announced last week will add another 440MWh to its growing operational capacity.
