British container generator manufacturers

Overview

Where can a containerised generator be used?

It can be used in various applications such as remote locations, disaster recovery, events, back-up power and construction sites where there is a need for reliable power supply. Each manufactured containerised generator is acoustically lined to achieve the external sound levels required at your site.

What is a containerised diesel generator?

A containerised diesel generator is a complete power unit housed in a modified ISO shipping container, offering long runtimes, noise control, and protection from the elements. These generators are ideal for remote sites, industrial operations, and export use, where durability and mobility are essential.

Can JPC supply a high power containerised generator unit?

JPC can also supply a high power containerised generator units. Which by widening the ISO container to accommodate a larger generator unit; these larger containerised generator unit can still be lifted into place using standard crane methods with standard locking corner casting positions for road transport.

What can containerising generators do for You?

These bespoke solutions include noise reduction systems for traditional generators, accommodating twin sets within a single container, and rental-ready designs. Containerising generators allows us to deliver a broader range of innovative and flexible power solutions. Enhanced Durability: Optional C4 paint finish for tough environments.

What is an ISO containerise generator unit?

A 'standard' ISO containerise generator unit denotes an installation where the original lifting points and dimensions of the intermodal container are left

unchanged.

What is a JP container?

JP Containers provide all of the necessary access points, doors, air flow control and noise control required to ensure the generator can operate safely, securely with minimum impact on the environment for the life of the generator.
