Business model of energy storage container

Overview

Are energy storage business models the future?

The lessons from twelve case studies on energy storage business models give a glimpse of the future and show what players can do today. The advent of new energy storage business models will affect all players in the energy value chain. In this publication we offer some recommendations.

How do business models of energy storage work?

Building upon both strands of work, we propose to characterize business models of energy storage as the combination of an application of storage with the revenue stream earned from the operation and the market role of the investor.

How will new energy storage business models affect the energy value chain?

The advent of new energy storage business models will affect all players in the energy value chain. In this publication we offer some recommendations. The new business models in energy storage may not have crystallized yet. But the first outlines are becoming clear. Now is the time to experiment, gain experience and build partnerships.

How many business models are there for energy storage technologies?

Figure 1 depicts 28 distinct business models for energy storage technologies that we identify based on the combination of the three parameters described above. Each business model, represented by a box in Figure 1, applies storage to solve a particular problem and to generate a distinct revenue stream for a specific market role.

What is a business model for storage?

We propose to characterize a “business model” for storage by three parameters: the application of a storage facility, the market role of a potential investor, and the revenue stream obtained from its operation (Massa et al.,

2017).

Why is energy storage important?

With energy storage becoming an important element in the energy system, each player in this field needs to prepare now and experiment and develop new business models in storage. They need to understand the key success factors of future market leaders and reinforce those in the next five years to contribute value to storage and the overall system.
