Can't the battery with BMS be fully charged

Overview

It is not feasible for electric vehicles to undergo a complete fast charging process due to the essential role of the Battery Management System (BMS) in ensuring charging safety and preserving battery life.

Can't the battery with BMS be fully charged

Regenerative braking + fully charged battery

Aug 15, 2019 · I've seen many cases with broken e-bikes+electrical scooters when using regenerative braking on a fully charged battery. What is most likely to break in such a ...

How is an eBike battery determined to be "Fully Charged"

Apr 5, 2020 · The BMS, as far as I can tell, is in "charge" (pun intended) of the battery to even out the charge between banks of cells, and to prevent a normal charger charging, if the battery ...

Multiple JK-BMS battery packs and different SOC

Jul 20, 2024 · I have a issue where all 3x battery banks stop charging at a certain point - which seems to be full - yet the battery packs show 90% / 96% / 86% (Each one) - all differing levels ...

5 Reasons Why Lithium Batteries Should Not Be Fully ...

Over-Discharge Deep Discharge
Conclusion: Keeping the battery from over-discharging helps lower the safety risks. 4. Capacity Loss When lithium batteries are fully discharged, the ...

Can (Why Can't) a iFePO4 battery be charged with a digital ...

Oct 24, 2020 · A 4 amp charger, (this may not be real amps output, it could be less), will take some time and unless your batteries have BMS communication I can foresee some difficulty is ...

JK BMS Strange "Battery is Fully Charged" error message

Nov 25, 2023 · The JK display was showing "ERR 2", and connecting via the app showed the message "Battery is fully charged (0S)". I've attached a screenshot from the app,

Help! Bought a used ebike with battery/BMS issues..

Aug 13, 2025 · Recently I bought a used Velowave Ranger ebike, and I have spent quite a bit of time fixing it up. I finally had it up and running, but I discovered a pretty severe issue with the ...

Should You Charge LiFePO4 Battery to 100% or 95%? Proper ...

11 hours ago · LiFePO4 batteries should be charged to 100% for optimal health, unlike NMC batteries. Full charging ensures cell balance via the BMS. Avoid deep discharge to extend ...

Good Chinese BMS review

Mar 6, 2019 · Obviously a lower cost BMS can't be expected to include every feature included in a BMS costing a few factors more, but readers might regard the ability to fully charge their ...

BMS 3S (S-8254A) with SJT-150E charger won't ...

Aug 28, 2024 · Lately, i've been trying to

use a BMS 3S that is based on the S-8254A IC to charge a group of three cells that I planned on using in series. To

...

Does a Battery Management System Stop Charging When Full?

Mar 14, 2025 · Yes, a BMS stops charging when the battery is fully charged. Once the voltage reaches the predefined threshold, the BMS cuts off the charging process to prevent overcharging.

Do some BMS's cut battery instantly when its voltage

...

Sep 19, 2022 · Battery came with a 54.6V 3A cooling fan charger. Charged it until the green light came on at which point, the charger automatically shut off. Don't have any BMS specifics since ...

Full Charge Behaviour (JK)

BMS)

Feb 27, 2023 · When it is fully charged (via a Multiplus on 230V shore power supply), the JK BMS cuts the charging off due to Cell Voltage Over Voltage Protection (14.4V, 3.6v/cell). The ...

JBD BMS and Battery Fully Charged , DIY Solar Power Forum

Jan 1, 2021 · I noticed when the Battery is fully charged the BMS turns off charging. Now the discharge is on and the current flows through the backfire Diodes of the charge circuit.

BMS Stops Charging, But Pack Isn't Fully Charged

Nov 17, 2020 · The BMS won't report an accurate SoC/Ah until it has been fully charged. 3.35-3.5V is a very undesirable condition. Cell 4 is filling up first, triggering over voltage protection ...

Can a Lithium Battery Be Charged With a Lead Acid Charger?

Jul 20, 2025 · No, charging a lithium battery with a lead acid charger is unsafe and can cause permanent damage. Many assume chargers are interchangeable, but this misconception risks ...

LiFePo4 batteries not reaching full charge voltage, but are still fully

Feb 17, 2023 · SmartShunt 500A 2x MPPT 100/30 Multiplus ii Cerbo Gx 4x UltraMax LiFePo4 102Ah 24V "drop in" batteries with internal BMS in parallel in a busbar configuration (identical ...

How is an eBike battery determined to be "Fully Charged"

Apr 5, 2020 · The BMS determines if the charger is allowed to deliver current for the charge to take place, if a battery group is below 3.1v - 3.2v then no charge will take place because the ...
