Construction of EMS small communication base station in Northern Cyprus

Overview

What is the EMS service in Cyprus?

The EMS service in Cyprus is EMS Datapost, part of Cyprus Post which is Cyprus' designated universal postal service provider, supporting customers, businesses and communities worldwide. Cyprus Post was founded in 1960 and joined the EMS Cooperative in 2000.

Does Northern Cyprus have a telecommunications infrastructure?

Northern Cyprus has been proactive in upgrading its telecommunications infrastructure. The state-owned telecommunications company, CYTA, manages most of the island's telecom and internet connections. However, the liberalization of the sector has allowed private companies to emerge, fostering competition and innovation.

What telecommunications companies are in Northern Cyprus?

The state-owned telecommunications company, CYTA, manages most of the island's telecom and internet connections. However, the liberalization of the sector has allowed private companies to emerge, fostering competition and innovation. A significant milestone in Northern Cyprus's telecom development is the Quantum Cable project.

Why is the European Union subsidising Northern Cyprus?

The European Union has been subsidising a host of economic and social projects since 2011. One of the aid programme's major aims is to expand and improve the infrastructure in Northern Cyprus with a view to alleviating serious deficiencies, especially in energy, transport, water supply and telecommunications.

Where can I get Mobile Internet in Northern Cyprus?

Mobile internet in Northern Cyprus is facilitated by two main providers: Kuzey Kibris Turkcell (KKTCCELL) and Telsim Vodafone (KKTC Telsim). Both offer

convenient prepaid “tourist” SIM cards that are easily obtainable from various outlets and supermarkets. KKTCELL: The largest cellular provider, KKTCELL, offers a range of prepaid packages.

Does Northern Cyprus have 4G?

Telsim Vodafone: Telsim Vodafone also offers a diverse array of packages, making it a strong competitor in the market. Currently, 4G technology is not available in Northern Cyprus, meaning mobile internet speeds typically range between 3-7 Mbps with a ping of 20-30ms.
