Containerized generator installation method

Overview

What is a containerised generator set?

On a regular basis, containerised generator sets (CGS) are placed on board ships to provide replacement power in case of a damage to one of the ship's generator sets, or additional power, e.g. to provide power to extra deck equipment or reefer containers. There are currently no clear rules and requirements for such time limited installations.

Why should you buy a Cummins containerized generator set?

More Robust. More Control. More Reliability. Factory pre-integrated and customizable per site requirements, the new Cummins Containerized Series generator sets can provide significantly shortened lead time for installation, and a lower cost of ownership via a flexible design.

How do you install a generating set?

remove the tractor. (Also refer to the relevant section of the generating set installation guide.) Make sure the ground is hard enough to prevent the assembly from sinking. Using the jockey wheel or stands ensure the generating set is level. Lock the handbrake. Lower the rear stands and lock them.

How to carry out installation activities for diesel generator?

To carryout installation activities for diesel generator below mentioned procedures are recommended to follow-up step by step in sequential manner. Pre delivery inspection shall be performed by the system manufacturer's local dealer at dealer's facility to ensure no damage is occurred in transit to all DG Set components.

How to store diesel generator set & accessories?

HANDLING & STORAGE OF DG SET: On receipt of the Diesel Generator Set and accessories at site, necessary precautions shall be taken for unloading,

shifting & storage, as follows:- Material shall be stored in a covered / dry space at all the time .

How do you lift a generating set?

Lift truck. Attach the hoisting device slings to the generating set lifting lugs designed for this operation. Slowly tighten the slings. Make sure the slings are evenly attached and strong enough. Slowly hoist the generating set. Move the set to the chosen site and place in position. Bring it down slowly while maintaining it in the right position.
