# Cost of energy storage for distribution network in the Democratic Republic of Congo

## Overview

---

What is the electricity access rate in the Democratic Republic of Congo?

The public version of the resulting report of the effort is available [here](#). The Democratic Republic of Congo's national electricity access rate is estimated at 19%. Less than 1% of the rural population and 41% of the urban population has energy access. Of the country's 10 million house-holds, only 1.6 million have access to electricity.

Could the Congo become an electricity exporter?

Almost all electricity generation today comes from hydropower and the Inga project has the potential to provide much more. If network constraints are addressed, Democratic Republic of the Congo could become an electricity exporter.

What is the power supply capacity of DRC?

o : 18 MW;Khimbi : 8 MW;The country's total installed capacity is 2442 MW. Which is about 100% hydro(clean energy). Available capacity is 1228MW.4. ELECTRICITY DEMAND AND SUPPLY SITUATION IN DRCThe Democratic Republic of Congo "DRC" is a big country i.

How does the Democratic Republic of the Congo support the economy?

In the AC, Democratic Republic of the Congo supports an economy six-times larger than today's with only 35% more energy by diversifying its energy mix away from one that is 95% dependent on bioenergy.

How much would it cost to get grid electricity in DRC?

Providing all households of the 26 provincial capitals of DRC access to grid electricity through a mix of mid-sized hydro and solar power plants would cost approximately USD 10.5 billion in CAPEX. This would raise the access rate to about a third of the population, at a cost equivalent to 30% of GDP.

What solar projects are being built in the DRC?

The main existing solar project in the DRC is a 1MW solar mini-grid with 3MWh of battery storage capacity built by Enerdeal and Congo Energy in the city of Manono, to supply the local population and SMEs. Enerkac has also developed a 1MW hybrid plant powering SNEL's Kananga mini-grid in Kasai Central (non operational in 2019).
