

## SolarTech Power Solutions

# Electric energy storage field reform plan

*LiFePO<sub>4</sub> Battery, safety*

*Wide temperature: -20~55°C*

*Modular design, easy to expand*

*Wall-Mounted&Floor-Mounted*

*Intelligent BMS*

*Cycle Life: ≥ 6000*

*Warranty: 10 years*

## Overview

---

Liquid fuels Natural gas Coal Nuclear Renewables (incl. hydroelectric) Source: EIA, Statista, KPMG analysis Depending on how energy is stored, storage technologies can be broadly divided into the follo.

What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

What is China's new energy storage development plan?

On March 21, the National Development and Reform Commission (NDRC) and the National Energy Administration of China issued the New Energy Storage Development Plan During China's "14th Five-Year Plan" Period. The plan specified development goals for new energy storage in China, by 2025, new.

How will new energy storage technologies develop by 2030?

By 2030, new energy storage technologies will develop in a market-oriented way. On March 21, the National Development and Reform Commission (NDRC) and the National Energy Administration of China issued the New Energy Storage Development Plan During China's "14th Five-Year Plan" Period.

Is energy storage in China's 5 year plan?

In 2016, energy storage was included in China's 13th Five-Year Plan national strategy top 100 projects. Energy storage has officially entered the national development plan for the first time and has been identified in the 100 major engineering projects which China plans to implement in the next five years .

Does China support energy storage technology research and development?

It is entirely consistent with the fact that the Chinese government and enterprises have increased their support for energy storage technology

research and development during China's 12th Five-Year Plan and 13th Five-Year Plan period. 2.2. Policy support.

How is energy storage developing in China?

However, China's energy storage is developing rapidly. The government requires that some new units must be equipped with energy storage systems. The concept of shared energy storage has been applied in China, which effectively promotes the development of energy storage. 4.3. Explore new models of energy storage development
