High quality din rail breaker in Ireland

Overview

What is a DIN rail circuit breaker?

A DIN rail circuit breaker is a type of circuit breaker designed for easy installation on a standard 35mm metal DIN rail. It mounts directly onto the front panel and snaps into place without requiring any external hardware.

What is a residual current circuit breaker with integrated overcurrent protection?

Residual current circuit breaker with integrated overcurrent protection (RCBOs) RCBOs are devices designed to provide enhanced protection for the safe operation of electrical circuits by enabling a disconnection trigger if any current disbalance is detected. RCBOs offer protection for both current overloads and short-circuits from earth leakages.

What is a DIN rail fuse disconnecter with indicator light?

Fuse disconnecter with indicator light The Acti9 DIN rail fuse disconnectors with indicator light provide high levels of protection to electrical circuits for all industrial applications that require a high breaking capacity. Reliable and easy to install, they are also suitable for isolation.
