How to choose UPS uninterruptible power supply in Romania

Overview

What is a UPS system?

A UPS, at its most basic, is a battery backup power system that supplies power long enough for equipment to properly shut down when utility power fails. It helps prevent loss of data and minimizes the stress a hard shutdown causes on your electronic equipment.

What are the 3 topologies of a UPS system?

UPS systems have three different topologies, or categories, based on what type of power protection you need. The three topologies are Standby, Line-Interactive, and Double-Conversion. What types of power problems do I have?

Many people are aware of only one type of power problem: a blackout.

How do I Choose an UPS system?

When choosing the form factor, the main consideration is where you are going to use it. A desktop or compact UPS can hide under a desk, unnoticed. A tower or mini-tower will have a pleasant aesthetic design making it an option to sit on top of a desk or table. A rackmount UPS works well in server rooms. Where do I pick out my UPS system?

.

How do I find ups capacity?

You will need to find the UPS capacity. Capacity is how much power a UPS system can provide (measured in Watts). The higher the capacity, the more electronic equipment, and devices it can support. To find the UPS capacity, you will need to calculate the load. The Load is the combined amount of power each of the devices use.

Why do I need an UPS system?

The UPS is also a surge protector that protects connected devices from power problems, like surges or abnormal voltages, which can damage, reduce lifespan, or affect performance of electronic equipment and devices. Why do I need a UPS System?

.

What is a 1kva (1000va) ups?

[Example] A 1kVA (1000VA) UPS can back up target devices with a voltage of 100V and a total current value of up to 10A. The difference between VA (apparent power) and W (active power) is explained in the downloadable document "Understanding the basics of UPS selection!" 2-2. Check the power consumption of the backup target device
