How to sell Huawei base station communication equipment

Overview

What are the top 3 base station equipment providers in the world?

The top three base station equipment providers are China-based Huawei with the share accounting for 30%, Sweden-based Ericsson with 23% shared and the third one is Finland-based Nokia with 20% market shares. The noticeable point is amid US sanctions, Huawei still leads the global market share and continues its leadership.

Who owns the base station equipment market?

The report discloses that more than 70% of the market is covered by Chinese and European suppliers. The top three base station equipment providers are China-based Huawei with the share accounting for 30%, Sweden-based Ericsson with 23% shared and the third one is Finland-based Nokia with 20% market shares.

What is Huawei base station backhaul microwave?

Based on leading wireless, transmission, and datacom technologies, Huawei base station backhaul microwave solution provides fiber-level broadband wireless backhaul capabilities, ultra-low latency, fully modular architecture design, and co-site integration with wireless networks.

What is the market share of base station equipment suppliers?

A world-leading market intelligence provider – TrendForce released the global market share analysis report of suppliers of base station equipment. The report discloses that more than 70% of the market is covered by Chinese and European suppliers.

Why is Huawei still leading the global market?

The noticeable point is amid US sanctions, Huawei still leads the global market share and continues its leadership. In reasons behind these growing shares are the product cost and high demand from the Chinese market.

What is the difference between a wireless base station and a microwave base station?

Wireless base stations are widely distributed, and the backhaul network requires high quality. The wired transmission of base stations requires high construction costs, long construction period, and high O&M costs. Microwave transmission is fast in network construction and provides a carrier-class availability of up to 99.999%.
