

## SolarTech Power Solutions

# Huawei Laayoune PV grid-connected inverter

## Overview

---

How many GW inverters did Huawei provide?

Huawei — the supplier with the largest project share — provided 1.6 GW inverters for this project. As the world's first ultra-high voltage power line that delivers 100% renewable energy over long distances, the project requires inverters with high voltage ride-through (HVRT) capability to ensure the safety and stability of the power grid.

What are the GB/T 37408-2019 technical requirements for photovoltaic grid-connected inverters?

Being the first to pass the GB/T 37408-2019 Technical requirements for photovoltaic grid-connected inverter, Huawei's smart string inverter supports short circuit ratio (SCR) as low as 1.5, without power derating during HVRT.

How do I change the grid connection status of the inverter?

The grid connection status of the inverter is switched by using the Backup Box. The critical load power does not exceed the max off-grid output power of the Inverter. You can add inverters and batteries to increase capacity. A maximum of three inverters can be cascaded.

What is Huanghe hydropower & Huawei doing?

Through joint innovation, Huanghe Hydropower and Huawei developed the industry-leading smart I-V diagnosis technology for global PV O&M, which has been widely adopted worldwide. Together, Huanghe Hydropower and Huawei are leading the introduction of intelligent technologies to PV systems.

How many inverters can be connected to a smart dongle?

When the grid charging function is enabled, the surplus power generated by one inverter can be used to charge the other inverter. Each L1/LC0/M1 can connect to a maximum of two ESSs, and each MB0 can connect to a maximum of four ESSs. In the Smart Dongle networking scenario, a maximum of three

inverters and six ESSs can be connected.

Can L1 Ic0 inverter be cascaded?

(master and slave) • L1/LC0 inverters can be cascaded. • If there is only one ESS, it must be connected to the master inverter. connect to a maximum of one ESS. (including optimizers) Master inverter Sensor to the same inverter in a parallel system. 14, 21)-S1 cannot connect to different inverters. Backup Box Backup Box-B0 inverter.

## Huawei Laayoune PV grid-connected inverter
