

## SolarTech Power Solutions

# Inverter as emergency home power supply

## Overview

---

What is an emergency inverter system?

Inverter systems are made up of a set of DC batteries and electronics that can convert the DC power from the batteries into an AC power source needed for the emergency lighting loads. Emergency inverter systems will provide enough emergency AC power for the required time to exit the building if necessary.

How do I use an inverter for emergency power?

A very simple way to use an inverter for emergency power (such as during a power outage), is to use a car battery (with the vehicle running), and an extension cord running into the house, where you can then plug in electrical appliances. More Questions?

(Back to FAQ).

Can you use an inverter for emergency back-up power?

Yes, you can use an inverter for emergency home backup power. One way is to have two 12-volt batteries hooked in parallel and one inverter, which will provide enough power to run a refrigerator off and on for a few days depending on the size of the batteries.

What are the uses of inverter power supply?

2.The inverter power supply is widely used in the fields such as Telecom, Mobile, Unicom, Aviation and spaceflight, finance management, OA, industrial auto control, medical treatment and sanitation, military affairs, scientific research etc. 3.Use the battery DC as input, after inverting,it will output the pure sine wave AC.
