

SolarTech Power Solutions

Kabul outdoor power supply purchase channel

Overview

Which country supplies electricity to Kabul?

Uzbekistan supplies Parwan, Samangan and partly Kabul. Tajikistan supplies Baghlan, Balkh, Kunduz and Takhar provinces and, in summer, it transmits power to Kabul (in winter, Tajikistan faces electricity shortages itself), while Uzbekistan additionally feeds Balkh province in summer. Iran supplies electricity to partly Herat and Nimruz provinces.

Can a 300 MW power plant be used in Kabul?

Kabul's peak load is in winter, thus the 300 MW could not be utilised by the consumers in the northern and central regions. The 300 MW can be dispatched to southern and eastern regions – both get their peak in summer – which again, is subject to transmission links with sufficient current carrying capacity.

Why does Afghanistan need asynchronous power supply?

While this has helped Afghanistan grow its electricity sales over the last five years, asynchronous supplies limit the opportunities to interconnect and expand the power network in a rational way. Of the five main geographically separate power networks in Afghanistan, the North Eastern Power System (NEPS) is the largest.

How much power does Kabul need?

The National Load Control Center of DABS, the 100 per cent state owned but corporatised national power utility and the sole power producer, transmitter and distributor in the country, states that Kabul's current demand is 530 MW.

What is the source of power for Afghanistan?

source of power for Afghanistan, since the large generation projects necessary to serve the extraction and processing of ores can readily be sized to meet more than just the mining project demand. Significant deposits of coal and

reservoirs of gas make such generation possible.

Will dabs increase electricity distribution in Kabul?

For instance, in 2003, electricity consumers in Kabul numbered 84,831 – at the end of 2014, numbers had increased more than five-fold, to 450,000. DABS is of course expected to increase distribution, as its mandate is to bring electrical power to the Afghan people.
