Lithium power station factory in Brisbane

Overview

Based on the Gold Coast, 75 km south of Brisbane, the 2,500 square metre factory is Australia's first community battery manufacturing facility and is set up to produce 300 lithium battery EV chargers a year. Where is Australia's first community battery factory?

Based on the Gold Coast, 75 km south of Brisbane, the 2,500 square metre factory is Australia's first community battery manufacturing facility and is set up to produce 300 lithium battery EV chargers a year.

Will lithium Australia build a battery supply chain in Australia?

"The MOU between Lithium Australia and Centrex highlights our commitment to building a battery supply chain domestically in Australia, which can provide global battery manufacturers an alternative supply source for LFP and LMFP," Lithium Australia managing director and chief executive officer Simon Linge said.

Who is building Queensland's biggest battery?

Premier Steven Miles, Deputy Premier Cameron Dick and Energy Minister Mick de Brenni have today marked the start of construction on one of Queensland's biggest batteries. In a partnership with Tesla and Yurika, Queensland's publicly owned CleanCo will deliver the \$330 million battery in Swanbank.

Could lithium Australia get a phosphoric acid supply deal?

Lithium Australia and Centrex offshoot, Agriflex, are in talks for a potential phosphoric acid supply deal from Agriflex's Ardmore phosphate rock mine in Queensland.

What happened to Australia's first grid-scale battery plant?

Last year Brisbane-based iron flow battery manufacturer Energy Storage Industries secured \$65 million from the state Labor government to build Australia's first manufacturing plant for grid-scale batteries, but flow battery

company Redflow was put into administration.

Who is delivering the \$330 million battery in Swanbank?

In a partnership with Tesla and Yurika, Queensland's publicly owned CleanCo will deliver the \$330 million battery in Swanbank. Set to be a pivotal component for the Swanbank Clean Energy Hub and Queensland's clean energy future, the Swanbank Battery will be constructed on the site of the former Swanbank B coal-fired power station.
