London 18W Solar Monitoring

Overview

Can London get more solar?

The Mayor's Solar Action Plan sets out how City Hall programmes are expected to more than double London's current solar energy capacity. But the Mayor thinks London can, and should, go further than this and wants to provide support to local government, businesses and others to install more solar in London.

Which London boroughs have solar panels?

Across the capital's 32 boroughs and the City of London, that means 1.7% of all households have installed solar panels. The best-performing borough is Havering, where 3.12% of homes have gone solar, just ahead of neighbouring Barking and Dagenham.

Are solar panels a good option for Londoners?

Whether you're closer to the Thames or the M25, if you're fortunate enough to live in London and you're looking to cut your electricity bills, solar panels could be the best way forward. From Hillingdon to North Ockendon, the capital gets more sunlight than most areas of the UK, which gives Londoners with solar panels a substantial advantage.

Which companies install solar panels in London?

Trusted Traders and provide a solar subscription option, though Sunsaver is the only top-rated company that installs in London which fulfils the latter requirement.

Can you get a solar panel grant in London?

There are some solar panel grants available in London, due to the work of local councils and national government schemes. They tend to come with stringent requirements, as they're generally aimed at underprivileged households with low energy efficiency ratings – but there is one exception.

What is the London solar opportunity map?

The London Solar Opportunity Map is based on the interpretation of LiDAR data (where laser technology is used to measure distances) collected and made available by the Environment Agency. It provides an initial estimate of the amount of electricity that could be generated from panels both on rooftops and at ground level.
