

## SolarTech Power Solutions

# Lora base station outdoor

## Overview

---

What is Lora gateway?

The LORA Gateway (Station de Base) is designed to deploy a private LoRaWAN network in the 863-870 MHz frequency band. This Gateway is powered and communicates with the server via Ethernet, or with a 3G SIM CARD.

What is the Lora network?

The LoRa network, also called LoRaWAN, is a dedicated Data network for IOT sensors. It provides small data transmission on large distances – up to 15 km, while consuming very limited energy, allowing sensors to be operated on small batteries.

What is a LoRaWAN gateway?

LoRaWAN Gateway – Base Station (3G – GPS) LoRaWAN Gateway designed for the deployment of a private LoRa Network. Power over ethernet. Communication over Ethernet or 3G. Integrated GPS. Supplied with pre-installed Packet forwarder software.

Where can a Lora transceiver be deployed?

The LoRa transceiver can be deployed as part of an existing telecommunications tower, individual stand or wall mount. At MultiTech, we're committed to providing you personalized attention and quality service while providing you a quick response to your product support needs. We have several options of support for you to choose from.
