What is a solar inverter?

An inverter is an essential component of a solar energy system as it converts the direct current (DC) electricity generated by solar panels into alternating current (AC) electricity that can be used to power appliances and fed into the electrical grid.

What are the different types of solar inverters?

The string inverter is the most common type of photovoltaic inverter, the simplest and the cheapest. Solar panel string (or strings) will be connected to a single inverter. The inverter will be mounted on an outside wall, usually next to the residence's electrical panel.

What size inverter do I need for a 6kW solar cell?

A 4.5kw inverter can also be used for the 6kw solar cell at a lower price than the 6kw inverter. Please note that if you want to maximize the size of the inverter, it will be difficult to add more solar panels in the future without adding a new inverter or installing a larger inverter than the original one.

What size solar inverter do I Need?

The size of the inverter depends on the size of the solar panel. Measured in kilowatts (kW), inverter size refers to the maximum amount of generated solar energy the inverter can handle. The maximum capacity of the inverter must be at least 75% of the capacity of the solar cell.

What is the maximum capacity of a solar inverter?

The maximum capacity of the inverter must be at least 75% of the capacity of the solar cell. In other words, the cell capacity can be up to 133% of the inverter capacity. For example, if you have a 6kw solar cell, the inverter must be able to manage a maximum of 6kw of energy and the simplest is to purchase a d 6kw inverter.
