Moroni Communications 5G Base Station in 2025

Overview

How many 5G base stations will China build in 2025?

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) announced during its annual work conference.

Will 5G Revolution & 6G innovation be a priority next year?

The move comes as the country charted its vision for industrial growth during a two-day work conference of the Ministry of Industry and Information Technology. With 4.19 million 5G base stations already in operation, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.

Who are China's 5G operators?

Chinese main operators are China Mobile, China Telecom and China Unicom. In addition to its expected expansion in the 5G field, China noted that it is also set to begin trials for 10-gigabit optical networks and enhance computing power infrastructure, reflecting the growing demand for artificial intelligence (AI) technologies.

Will China's 5G penetration rate increase in 2021?

The plan also proposed that the penetration rate of 5G users in China will increase from 15 percent in 2020 to 56 percent in 2021, and by then, 80 percent of China's administrative villages will have 5G signal accessibility.

What will China do with the 5G push?

Alongside the 5G push, China will also start trials for 10-gigabit optical networks and optimize computing power centers amid an artificial intelligence (AI) boom brought on by ChatGPT.

How big will the information and communication industry be in 2025?

The five-year plan also forecast that by the end of 2025, the information and communication industry will maintain an annual growth rate of about 10 percent to reach a total revenue of 4.3 trillion yuan (\$674.2 billion) in 2025.
