How do Finnish-Swedish power systems work?

In the investment optimisation stage, realistic Finnish-Swedish power systems are created based on the aforementioned scenarios, incorporating various energy sources and technologies such as nuclear energy, wind power, photovoltaic solar, battery storage and peaker plants.

What is a Nordic energy analysis?

One of the largest analyses for the Nordic is conducted by Nordic Energy Research, under the auspices of the Nordic Council of Ministers. Very detailed analysis of various system's stability/security of supply with high temporal granularity, good representation of international electricity trade, and many different weather scenarios.

Does energy transition occur in the Nordics?

The literature on energy transition in the Nordics [, , ] often reach similar conclusions, at least directionally, with dominance of wind power throughout the region, abundant hydropower in Norway and Sweden and surprisingly high shares of solar PV even in such high latitudes.

Will Power consumption grow in the Nordic countries up to 2030?

Anticipating robust growth in power consumption in the Nordic countries up to 2030. Our estimates, though conservative, consider challenges like project cancellations, delays due to power and grid access issues, technological/economic obstacles, increased costs, and supply chain disruptions over the past years.

Why do Nordic countries rely on wind & solar power?

The Nordic countries as well as northern Europe are increasing the share of wind and solar power on the supply side, as well as electric heating on the demand side, resulting in an increase in the electricity system's weather-

dependency.

How does interconnection affect solar power in the Nordics?

Interconnection offers more flexibility through exports and imports [53, 115] and improves grid resiliency . Future strong growth of solar PV in the Nordics could be facilitated with a lateral spread of the Nordic electricity grid, slightly smoothing out the solar PV output and consumption on the entire grid.
