Overview

Which international trade issues will remain a concern for energy storage projects?

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity.

Are bio-batteries environmentally friendly?

Bio-batteries in general are environmentally friendly since they do not possess toxic metals and are easily biodegradable. Ultimately, energy storage devices will be the necessary technology for renewable energy and are promising catalysts towards decarbonization and reduction of greenhouse gas emissions.

Are storage batteries a priority for border detentions for forced labor evaluation?

Storage batteries have been indicated as a priority for border detentions for forced labor evaluation, and we expect to continue to see those goods identified as a concern.

Can batteries self-discharge?

Batteries can self-discharge, which is a common but unwanted phenomenon in energy storage technologies [219, 220].

Will China impose tariffs on lithium-ion EV batteries?

An interesting issue will be the imposition of tariffs. There are existing tariffs pursuant to Section 301 of the Trade Act of 1974 on some Chinese-origin lithium-ion EV batteries and non-lithium-ion battery parts, which were increased to 25% in September 2024.

How can battery storage help balancing supply changes?

The ever-increasing demand for electricity can be met while balancing supply changes with the use of robust energy storage devices. Battery storage can help with frequency stability and control for short-term needs, and they can help with energy management or reserves for long-term needs.
