Panama Colon Energy Storage Vehicle Price

Overview

How will POSCO E&C's Colon power plant work?

POSCO E&C will also construct a gas terminal with a storage capacity of 180,000³. Power produced from the Colon combined cycle power plant can be supplied to around 15 million households simultaneously, which will ensure a stable supply to the industrial complex near the Panama Canal and Colon area.

What is the largest power plant in Panama?

The power generation capacity of Colon CCPP—380MW—is the largest in Panama. The plant is located in Colon, which lies near the Atlantic entrance to the Panama Canal and is about 60km north of Panama City, the capital of the country. POSCO E&C will also construct a gas terminal with a storage capacity of 180,000³.

When will a 500MW energy storage application be released?

Publication for the application will be released in February of this year. Panama has launched a 500MW tender auction for renewables and energy storage, the first in Central America to include storage.

Why did the Panamanian government cancel the GTPP power project?

In April 2024, the Panamanian government denied a request from Sinolam Smarter Energy to extend its permit for the GTPP power project through December 2025, and officially cancelled the license previously granted, effectively shelving the project.
