Overview

Does Peru have a power market?

This paper analyzes the experience of Peru with power markets, including market design, implementation, and outcomes. A cost-based power pool with locational marginal prices was established overnight, with bilateral contracts among market participants and regulated capacity payments.

How much will Peru's power market cost in 2022?

However, in recent years, changes in trading arrangements in the market have incentivised power prices to reach an average annual price around USD30/MWh in 2022. Our AFRY Independent Market Report provides a comprehensive review of the Peruvian power market and examines the key challenges for the further development of the market.

What is power market design in Peru?

A broad overview of power market design in Peru is summarized in Table 3-2. Table 3-2 Power market design overview, Peru. Mandatory net pool based on costs with technical and economic parameters supplied by generators. All energy withdrawals from the grid are balanced in the pool.

How has the Peruvian power market adapted?

The Peruvian power market was established in 1992, amid serious supply constraints and financially distressed power utilities. Since its inception, the market has been adapted by competitive market reforms and adaptations due to government-driven public policy objectives.

What are the customer choice arrangements in the Peruvian power market?

Table 3-1 Customer choice arrangements in the Peruvian power market. Since 2018, new regulations of the spot market allow direct customer participation in the pool. Large customers can purchase up to 10% of their maximum demand over the last 12 months.

Does Peru have a power supply?

Historically, Peru has relied mostly on hydropower, but after the entry into production in 2004 of natural gas from the Camisea gas fields, thermoelectric generation started to be an increasing part of power supply.
