Photovoltaic DC combiner box in Porto Portugal

Overview

What is a DC combiner box?

Our DC combiner boxes offer users the possibility to integrate short-circuit and overvoltage protection, as well string monitoring solutions (I,V, T and SPD and switch isolator status), for PV systems using central inverters with PV panels in trackers and fix tilt systems.

Does ABB offer prewired solar combiner boxes?

ABB also offers prewired solar combiner boxes with not only string protection, surge protection and disconnection but also with additional monitoring devices. The monitoring device CMS PV collects all main information such as string current, voltage and temperature in one device.

How does a DC/DC converter work in a photovoltaic system?

With the DC/DC converters, control cabinets are supplied directly from the photovoltaic system. Connectors designed for field assembly are ideal for cabling photovoltaic systems. Wireless communication in PV systems: The wireless system transmits I/O signals or serial data.

How are PV DC combiner boxes tested?

PV DC combiner boxes are tested according to IEC-61439-2 and are constructed on the basis of the test results as well as assembled for the specific application. This ensures that each of the requirements of the target application is fully met.

Why should you buy a DC combination box from Phoenix Contact?

The DC Combiner Boxes from Phoenix Contact satisfy this demand and also feature a space-saving housing. Our monitoring system for photovoltaic strings enables you to respond immediately to malfunctions and power losses, even when individual strings fail.
