# Photovoltaic energy storage 3s

## Overview

---

In the world of Energy Storage, the "3S System" refers to the three core components: the Battery Management System (BMS), the Energy Management System (EMS), and the Power Conversion System (PCS). What is a 3s energy storage system?

In the world of Energy Storage, the "3S System" refers to the three core components: the Battery Management System (BMS), the Energy Management System (EMS), and the Power Conversion System (PCS). These three systems work in perfect synergy to ensure the safety, stability, and efficiency of energy storage operations.

What are photovoltaic systems & energy storage systems?

The energy transition and the desire for greater independence from electricity suppliers are increasingly bringing photovoltaic systems and energy storage systems into focus. Photovoltaic systems convert sunlight into electricity that can be used directly in the household or fed into the public grid.

What are Viessmann photovoltaic modules & energy storage systems?

Viessmann photovoltaic modules and energy storage systems are not only an efficient way to self-generate and use solar power, but they also integrate seamlessly into the ecosystem. For example, they can be combined with a Viessmann heat pump or charging station for electric vehicles.

How does a photovoltaic system work?

Photovoltaic systems convert sunlight into electricity that can be used directly in the household or fed into the public grid. An energy storage system stores surplus electricity temporarily and releases it again when required. This significantly increases self-consumption and reduces electricity costs.

What is a vitocharge VX3 energy storage unit?

Viessmann has developed the modular Vitocharge VX3 energy storage unit for

optimum use of solar power for self-consumption. Its modularity makes it suitable for both new and existing systems. Equipped with the latest generation of safe lithium iron phosphate batteries, the VX3 enables reliable, long-term energy storage.

Is Wuhe a 3s-integrated energy storage station?

Notably, the Wuhe high-safety, high-reliability 3S-integrated energy storage station was successfully approved as part of the "2023 Third Batch of Major Energy Technology Equipment (Projects)" by the National Energy Administration in October 2023.
