

## SolarTech Power Solutions

# Portable power supply industry

## Overview

---

The global portable power station market size was valued at USD 4.0 billion in 2021, and portable power station industry is projected to reach USD 5.9 billion by 2031, growing at a CAGR of 3.9% from 2022 to 2031. What is the global portable power station market size?

The Global Portable Power Station Market size is estimated at US\$ 400 million in 2023 to reach a valuation of US\$ 580 million by 2029, with a CAGR of 7.64% during the forecast period 2024-2029.

Why is the portable power station market growing?

The portable power station market is moving toward a growth stabilization phase in its industry life cycle. The factors driving the growth of the market for portable power stations include a rise in demand for emergency power, off-grid power, and automotive.

What is the global market for portable power plants?

Portable power plants are widely used to store renewable energy and to provide electricity when needed. Therefore, it is estimated that the technological shift towards renewable energy generation will drive the global market for portable power stations during the outlook period.

How much is the portable power station market worth?

According to the report titled, "Portable Power Station Market," the portable power station market was valued at \$4.0 billion in 2021, and is estimated to reach \$5.9 billion by 2031, growing at a CAGR of 3.9% from 2022 to 2031.

What are the major markets for portable power stations?

The UAE is anticipated to be one of the major markets for portable power stations due to the widespread use of portable power units, particularly for off-grid and emergency power supplies in the Middle East and Africa. Brazil is predicted to dominate the South American market.

Why are portable power plants important in North America?

North America is likely to have a significant share of the global portable power plant market due to high electricity consumption, stringent federal guidelines, and regulations regarding increasing greenhouse gas emissions. energy costs and increased awareness of the benefits of portable power stations in the region.
