# Romania s new energy and energy storage

## Overview

---

Romania expects its overall energy storage to amount to at least 2.5 GW in operating power at the end of 2025, and to expand to as much as 5 GW a year later, local media reported, citing Minister of Energy Sebastian Burduja. Why is Romania investing in battery storage?

As part of its energy transition strategy, Romania is investing in storage technologies. Through the National Recovery and Resilience Plan (PNRR), the Ministry of Energy has initiated battery storage projects with a total capacity of nearly 800 MWh. These initiatives aim to stabilise the grid and integrate intermittent renewable energy sources.

How much money will be invested in Romania's energy sector?

Today, the Minister of Energy, Sebastian Burduja, announced on Facebook that an additional €150 million will be invested in Romania's energy sector. "I am pleased to announce that the Ministry of Energy is launching a new call for projects financed through the Modernization Fund, aimed at investments in energy storage capacities (batteries).

Is Romania a promising market for energy investments?

Romania's energy sector is characterized by opportunities in emerging areas such as hydrogen and LNG, alongside ongoing investments in renewable energy and nuclear power. The regulatory environment is evolving to support these developments, making Romania a promising market for energy investments.

Who can participate in a new energy storage project in Romania?

Eligible participants include Romanian economic operators – micro-enterprises, SMEs, large companies, newly established entities, and public institutions. The projects must focus on building new energy storage capacities in Romania," the minister stated.

Why is energy storage a key priority in Romania?

"Supporting energy storage is a key priority," he said. Romania's first energy strategy in 17 years provides for energy transition to ensure the country's energy security. [Giovanni Mereghetti/UCG/Universal Images Group via Getty Images].

Does Romania's energy strategy include uranium production?

Romania's Energy Strategy also includes plans to resume domestic uranium production. (Catalina Mihai | Euractiv.ro) "Supporting energy storage is a key priority," he said.
