Which electrical appliances work in Japan?

Certain types of electrical appliances such as dual-voltage hair dryers, travel irons and shavers should work wherever you are in Japan. However, in other cases, a step-down transformer is required to convert the voltage. In urban areas, it is relatively easy to find devices such as conversion plugs and transformers.

What voltage is used in Japan?

The voltage used throughout Japan is uniformly 100 volts, A.C. There are two kinds of frequencies in use—50 Hertz in eastern Japan and 60 Hertz in western Japan (including Nagoya, Kyoto and Osaka). Certain types of electrical appliances such as dual-voltage hair dryers, travel irons and shavers should work wherever you are in Japan.

Can I buy electronic appliances outside of Japan?

If you intend to buy electronic appliances in Japan for use outside of Japan, you are advised to look for equipment specifically made for overseas tourists.

What is the frequency of electric current in Japan?

The frequency of electric current is 50 Hertz in eastern Japan (including Tokyo, Yokohama, Tohoku, Hokkaido) and 60 Hertz in western Japan (including Nagoya, Osaka, Kyoto, Hiroshima, Shikoku, Kyushu); however, most equipment is not affected by this frequency difference. A possible exception

are timing devices, such as some clocks. Questions?

.

Where can I buy a Shinkansen?

They are sold in electronics quarters such as Tokyo's Akihabara and Osaka's Nipponbashi, or at major home appliance mass retailers such as Yodobashi Camera or Bic Camera. If you need to charge your appliances on the go, new shinkansen models have outlets next to the window seats.
