Solar 12W water pump

Overview

What are solar energy-powered water pumps?

Solar energy-powered water pumps are water pumps running on the electricity that is generated by solar energy. For generating solar power, solar photovoltaic (PV) systems are used for complementary energy sources, they are deployed alongside diesel pumps in areas with plenty of sunshine and where the cost to run power lines is high.

Are Jabsco water pumps solar powered?

Our range of solar powered house water pumps also includes a large range of pond, garden and fountain solar pumps. The Jabsco water pump range are ideal for most small house solar pump and off grid applications as these water pumps have a built in by-pass in their system.

What is a 12V water pump by-pass?

The by-pass lowers pulsation and noise, water hammering and cycling as it helps alleviate excess pressure in the pump system and reduces the need for a pressure tank. FAQ: Setting up a 12V water pump system in a solar cabin or shed
