Solar power station portable in Chad

Overview

Where is Chad's first solar power plant located?

InnoVent has therefore decided to develop the country's first solar power plant, by implanting it in Abéché, the second largest city in Chad with 80,000 inhabitants, but which is not connected to the national electricity grid. The project's beginnings date back to the end of 2015.

How did Power Africa help Djermaya solar project in Chad?

In Chad, Power Africa transaction advisory and technical assistance helped secure a \$20.6 million (€18 million) loan to bring the 42 MW Djermaya Solar project to financial close.

Why is electricity so expensive in Chad?

Despite these resources, electricity remains very scarce in Chad, making it one of the most expensive in the world. Today, apart from the 1 MW wind power plant (composed of 4 wind turbines) in Amdjarass, a town in the east of the country, electricity is only supplied by generators, which regularly break down.

Why did Innovent develop a solar power plant in Chad?

The other advantage would be the preservation of the environment, important in a semi-desert country like Chad. InnoVent has therefore decided to develop the country's first solar power plant, by implanting it in Abéché, the second largest city in Chad with 80,000 inhabitants, but which is not connected to the national electricity grid.

How much energy does Djermaya generate?

Djermaya's generation capacity consists of 34 MW of solar and an additional 8 MW-equivalent (4 MWh) in a battery energy storage system (BESS), one of the largest in the region. Once online in 2023, Djermaya is expected to power 60,000 households, reduce the cost of electricity generation, and improve

access to cleaner energy.

Why is electricity only supplied by a wind power plant in Amdjarass?

Today, apart from the 1 MW wind power plant (composed of 4 wind turbines) in Amdjarass, a town in the east of the country, electricity is only supplied by generators, which regularly break down. Oil, which is used to run these generators, is expensive and highly polluting energy.
