Overview

What is a photovoltaic curtain wall?

Building Integrated Photovoltaics At Onyx Solar we provide tailor-made photovoltaic glass in terms of size, shape, transparency, and color for any curtain wall design. Photovoltaic curtain walls transform any building into a self-sufficient energy infrastructure and enhance the building's architectural design.

Does photovoltaic curtain wall system cost more than traditional curtain-wall system?

Photovoltaic curtain-wall system may have higher labor costs than traditional curtain-wall and other traditional systems especially in the United States. The demand and manufacturing production volumes are lower in United States than Europe. Existing BIPV system projects show high design and final project costs.

What is a spandrel Photovoltaic Glass?

Similarly, Onyx Solar's innovative spandrel glass not only offers a sleek appearance but also generates clean, renewable energy. Traditionally used to cover building structures, our opaque spandrel photovoltaic glass delivers superior energy efficiency with high solar energy yield, thanks to its dense solar cell integration.

What is photovoltaic architectural glazing?

Photovoltaic architectural glazing enables buildings to produce extra energy while maintaining their design, functionality, and views. They enhance thermal comfort and help prevent the greenhouse effect. A standard curtain wall offers no return on investment.

What is a curtain wall?

Curtain walling refers to a non-structural cladding system made from

fabricated aluminum, commonly used on the outer walls of tall multi-storey buildings. This lightweight material offers ease of installation and can be customized to be glazed, opaque, or equipped with infill panels.

What are aluminum curtain walls?

The aluminum systems are not only easy to transport but also straightforward to manufacture. Curtain walls —also known as glass façades and exterior glazing systems —convert previously unused spaces into energy assets, enhancing both aesthetics and functionality.
