# The difference between high voltage and low voltage inverter

## Overview

---

The distinction between low-voltage (LV) and high-voltage (HV) inverters extends beyond nominal voltage thresholds, encompassing design architectures, efficiency trade-offs, and application suitability. How do low frequency inverters work?

Low frequency inverters work with internal transformers, heavy metal cores and copper windings, which are generally more robust, and have more grunt to run motorised equipment.

What is a high frequency inverter?

For your fridge compressor, washing machines, pumps, etc. this type of inverter can handle a higher start-up surge that is caused by the magnetic windings in an electro-motor. High frequency inverters run with fancier electronics doing high-speed switching to achieve a 230V output.

Why do inverters trip off if it rains?

High voltage DC rated isolators and breakers are more expensive and difficult to source. Finally, if your panels happen to leak when it rains, there is a tendency for this leakage current to push up the bus voltage, so inverters can trip off with fault code 08 (bus voltage too high).

Why do solar panels have a low voltage?

in solar panels, low voltage forces thicker cables to be used due to voltage drop. On the other hand, if the panels are not all oriented exactly in the same position, it is convenient to use more strings, that way you will have low tension.

Is array wiring a better option for a high voltage PV system?

On the positive side for higher voltage PV systems, array wiring is definitely easier and cheaper with a single or relatively few strings of panels in series. Losses are slightly lower for high voltage systems, though you can

compensate for this by using thicker PV wiring. On 2022/06/01 at 8:20 PM, Coulomb said:.

Do 5kW & 48V inverters have the same battery voltage?

Because if you are specifying that both inverters are 5kW and 48V, then you are saying that they have exactly the same battery voltage, namely 48V. Maybe give examples of the make and model. If this doesn't fit, please ignore.
