What is the difference between FTO glass and ITO conductive glass?

FTO conductive glass and ITO conductive glass seems to be a pair of twins, the name is only a difference of one character, but also are a kind of conductive glass. So, you may ask: what is the difference and connection between FTO glass and ITO glass, can they replace each other?

.

What is ITO conductive glass?

1, definition-wise, the two have different coating layer compositions. ITO conductive glass refers to the sodium-calcium-based or silicon-boron based substrate glass on the basis of the use of magnetron sputtering method coated with a layer of indium tin oxide film processed glass.

What is the difference between ITO coated and FTO coated glass?

In research and industry mainly ITO and FTO coated glass used. Here are the following comparisons between ITO coated glass and FTO coated glass. · There is a passivation layer on the glass surface, then ITO coated on the passivation layer. · FTO-coated glass is cheaper as compared to ITO glass.

Are PSCs with ITO coated glass better than FTO-coated glass?

The PSCs with ITO-coated glass achieved the 10.8% conversion efficiency, which is higher than that with FTO one (9.0%). The first finding is that the PSCs with ITO-coated glass substrate has lower resistances in series and parallel than those with ITO coated one.

Why is FTO glass better than ITO glass?

The etching process for FTO glass is easier compared to ITO glass. This means that FTO glass has relatively higher processing efficiency. FTO glass exhibits better resistance to high temperatures than ITO and can withstand

temperatures up to 700 degrees. This implies that FTO glass offers greater stability in high-temperature environments.

What is FTO conductive glass?

ITO conductive glass refers to the sodium-calcium-based or silicon-boron based substrate glass on the basis of the use of magnetron sputtering method coated with a layer of indium tin oxide film processed glass. FTO conductive glass refers to fluorine-doped tin dioxide conductive glass.
