

SolarTech Power Solutions

Vienna solar air conditioning manufacturer

Overview

How is a solar air conditioner shipped?

Packaging: The solar air conditioner unit is securely packaged to protect it from potential damage during transportation. The packaging typically includes foam padding, cardboard boxes, and other protective materials.

Transportation: The solar air conditioner is loaded onto a shipping vehicle for transportation.

How does a solar air conditioner work?

The next-generation solar air conditioners take the improvements made by inverter technology to the next level. By capturing thermal (ambient) energy, the amount of work the condenser does is reduced under full load and significantly extends the time the compressor is cycled off. Does the thermal panel have to be in direct sunlight?

.

What is a solar hybrid air conditioner?

Our solar hybrid air conditioner units are similar to traditional solar air conditioners, easy and convenient to install, and compact in size. How do SolAir World solar air conditioners get shipped?

Our Solar air conditioners are typically shipped using standard shipping methods, similar to conventional air conditioning units.

How is a solar air conditioner transported?

Transportation: The solar air conditioner is loaded onto a shipping vehicle for transportation. Depending on the destination and shipping method, it can be transported by truck, train, ship, or airplane. The shipping company responsible for the transportation ensures that proper handling and safety measures are followed.

Why should you buy a solar hybrid AC/DC air conditioner?

Electricity bill can be saved a lot. STIN will keep solving the global environment problem. The solar hybrid AC/DC air conditioner can work without battery, it works with unstable solar panel DC power at day time. At night or rainy days it automatically get grid AC power. It's mainly used for school classroom, hospital, restaurant, shops, office.
