# Where are Andorra Communications 5G base stations deployed

## Overview

---

Which country is the leader in 5G deployment?

China is the main competitor of the United States in the race for the title of leader in 5G deployment. By 2024, the Middle Kingdom had installed over 1.2 million 5G base stations and already has over 600 million subscribers .

Which countries are implementing 5G?

The Americas and Europe are on the forefront of 5G implementation, as our map shows. But investments in the technology have also been made in almost every country in Asia, with the technology also already deployed in many Asian countries.

How many 5G base stations will China have in 2020?

European 5G observatory reported that China intends to have 600,000 5G base stations by the end of 2020. According to RCR wireless, Chinese telcos have already deployed over 20,000 5G base stations in Shanghai. According to Tefficient, China Mobile had 188k 5G base stations in June 2020.

When will 5G reach 1 billion users?

Approximately 15 more have had 5G mobile technology deployed in part. It is expected that 5G will reach 1 billion users this year after just in 3.5 years in use, compared with 4 years for 4G and 12 years for 3G. The Americas and Europe are on the forefront of 5G implementation, as our map shows.

Which country has the first 5G network?

South Korea is the country which deployed the first 5G network and is expected to stay in the lead as far as penetration of the technology goes, By 2025, almost 60 percent of mobile subscriptions in South Korea are expected to be for 5G networks.

When will 5G be available in Brazil?

Brazil is accelerating the deployment of 5G networks after successful frequency auctions in the 3.5 GHz band. Operators like Claro, Vivo, and TIM are deploying networks in key urban areas, aiming to cover all state capitals by the end of 2024 . Residents of 27 of Brazil's most important cities will then gain access to 5G.
