Overview

How many 5G base stations are there in China?

In data collected between July 2022 and June 2024, China was reported to have had around 3.5 million 5G base stations installed across the country, with Chinese mobile operators investing heavily in 5G infrastructure. By comparison, the European Union had around 460,000 thousand base stations, while the United States had approximately 175,000.

Who makes 5G in China?

While 92 percent of 5G base stations in China had been manufactured by Chinese companies, Ericson and Nokia were the only overseas players accounting for six and two percent of base stations respectively. All companies have generated significant profits from their 5G business in China. Get notified via email when this statistic is updated.

How many DoCoMo base stations are there in 2021?

In an earlier post on NTT Docomo, we pointed out that Docomo coverage is forecast to increase from 500 base stations in 150 locations to 10,000 sites (in about 500 cities) by June 2021 and 20,000 by March 2022. According to Tefficient, Rakuten had 5739 LTE base stations on air at the end of June.

How many LTE base stations does Rakuten have?

The three incumbent operators have roughly 200000 LTE base stations each. @Rakuten_Mobile had 5739 LTE base stations on air at the end of June. Within that coverage area, Rakuten's UN-LIMIT customers have unlimited mobile data, outside of it limited data over au's network.

What is a baseband unit (BBU)?

For example on a tower hosting multiple operators, each of them will have their own Baseband Unit (BBU), so this is multiple base stations. If for an operator, there are multiple generations of technologies and within each of

these generation, multiple frequencies, sectors, etc.
