

SolarTech Power Solutions

Which manufacturers of energy storage containers are there in Bulgaria

Overview

What is the largest energy storage facility in Eastern Europe?

The project, the largest in Eastern Europe, has been realised by Solarpro, a company specialising in energy generation and storage solutions across Europe. The facility became operational in early June 2024, following the installation of Hithium's 16 energy storage containers, each with a 3.44MWh capacity.

Why do we need energy storage solutions in Bulgaria?

Establish a reliable energy system with greater share of intermittent generation. In the context of Bulgaria's energy landscape, energy storage solutions present a diverse array of benefits to various stakeholders stemming from its unique ability to time-shift energy and rapidly respond when called upon. The applic.

Can battery-based energy storage improve peaking capacity in Bulgaria?

Storage can also offer greater flexibility and efficiency in managing the grid. Furthermore, and although hydropower storage already makes up a significant source of peaking capacity in Bulgaria, battery-based energy storage can address peaking needs during times of droughts, meet requirements for more distributed peaking po.

Where does Bulgaria get its electricity from?

Electricity came from thermal power stations, and only 7 percent from solar and wind¹. Historically, Bulgaria has also been a major producer and exporter of electricity for the surrounding region with a total of 10 interconnectors spread across Romania, Serbia, North Macedonia, Greece, and Turkey. The country thus has a critical role in driving a more s.

Are electricity prices volatile in Bulgaria?

Electricity prices (where all businesses buy power) in Bulgaria are currently highly volatile. In

2022, Bulgaria saw wholesale electricity prices that were among the.

What challenges will Bulgaria face on its energy transition?

d a glimpse of the new challenges Bulgaria will face on its energy transition. In May 20 3, Bulgaria was for the first time in a decade a net importer of electricity². The reason for this was not a lack of generating capacity, but instead the natural logic of power markets seeking the
