

SolarTech Power Solutions

Wholesale 240v power station in Switzerland

Overview

What is the electricity mix in Switzerland?

The Swiss electricity mix varies from year to year, depending on the availability of different forms of production. Basically, around 60 percent comes from hydropower, around 30 percent from nuclear power and around 10 percent from new renewable energies. PV has been increasing for several years, while growth in wind power remains modest.

How many electricity supply companies are there in Switzerland?

The electricity supply to Swiss end customers is ensured by some 630 electricity supply companies. Many of the municipal utilities are also responsible for supplying their customers with water and gas.

How is electricity paid in Switzerland?

The electricity price paid by Swiss households consists of three components. These are the grid costs (delivery from the power plant to the customer), the production costs and the taxes (water rate, compensatory feed-in remuneration - KEV, etc.). They each amount to approximately one third of the final price for the consumer.

Who owns electricity in Switzerland?

Almost 90% of the Swiss electricity utilities are owned by the public sector, i.e. cantons and municipalities, around 8% are privately owned by Swiss investors and 2% by foreign investors. Electricity prices for end customers rose sharply in 2023. A typical household paid an average price of 26.95 cents per kilowatt hour in 2023.

Does Switzerland produce electricity?

Over the year as a whole, Switzerland usually produces enough electricity to cover domestic consumption and can therefore export electricity. However, electricity production is particularly high in the summer, whereas in the winter

in most years Switzerland is dependent on imports.

How big is the Swiss electricity grid?

The Swiss electricity grid is huge. It consists of over 250,000 kilometres of lines - and thus extends around the world more than 6 times. The Swiss electricity grid is divided into seven grid levels. These include extra-high voltage (380 kV/220 kV), high voltage (36 to 150 kV), medium voltage (1 kV to 36 kV) and the low voltage level (up to 1 kV).

Wholesale 240v power station in Switzerland
