What are inverters & uninterruptible power supplies (UPS)?

Inverters and Uninterruptible Power Supplies (UPS) are key elements in power system infrastructure. An inverter is a device that converts direct current (DC) to alternating current (AC), enabling the use of electrical appliances when main power is unavailable, such as in solar power systems or mobile applications.

What is an inverter & how does it work?

An inverter is a device that converts direct current (DC) to alternating current (AC), enabling the use of electrical appliances when main power is unavailable, such as in solar power systems or mobile applications. It essentially transmutes stored power from batteries into usable energy.

What types of inverters are available?

We offer pure sine wave inverters, hybrid inverters, and off-grid inverters, all of which are compatible with various battery types and energy storage systems. Our inverters are engineered for optimal performance, durability, and energy efficiency.

What types of inverters does PSS distributors offer?

Whether you need a small-scale solution for home appliances or a large, robust system for industrial applications, PSS Distributors has the right inverter to meet your needs. We offer pure sine wave inverters, hybrid inverters, and off-grid inverters, all of which are compatible with various

battery types and energy storage systems.
